Hazel Avenue Widening Project ***Signal Malfunction at Hazel Avenue & Winding Way*** ***-Motorists Should Expect Delays-***

What: On September 7th, as part of project work for the Hazel Avenue Widening Project, an electrical line on Winding Way was damaged. As a result, the traffic signal at the intersection of Hazel Avenue and Winding Way is currently on flash and causing significant delays. Flaggers are assisting traffic flow on Hazel Avenue, with all vehicles having to stop at the intersection.

Alternative Routes: Due to heavy congestion expected to last into the early evening, we are advising motorists to use alternative routes and avoid using Hazel Avenue.
