Sacramento County Elections Media Release

Sacramento County Elections Office

Releases Sacvote Mobile Application

Registrar of Voters Jill LaVine announced today that staff at Sacramento County Elections created a mobile application especially designed for iPhones, Androids, and iPads which allows Sacramento County voters to check their registration or view election information anytime, anywhere, using their mobile device.

“Now voters can use their mobile device to check their registration or view who their elected officials are” says Jill LaVine, Sacramento County Registrar of Voters.

Interested members of the public are able to view their registration status and register if needed, look up their districts and representatives including contact information or contact our office with any questions about elections or voting.

Prior to each election, the Sacvote mobile application will be updated with important election date reminders, and offer links to:

- Voters Sample Ballot Booklets
- Locating the nearest polling place
- Finding the nearest Ballot Drop-Off locations
- Sacramento County Elections website for questions about elections and voting

This new Sacvote application is available for free by visiting the iTunes or Google app stores and downloading the application – Sacvote - to your mobile device.

For more information, contact Alice Jarboe at (916) 875-6255.
