### **Neighborhood Traffic Management Program** *2011 Neighborhood Street Plans*

Sacramento CA – At their December 6, 2011 meeting, the Sacramento County Board of Supervisors approved the implementation of the last 3 Neighborhood Traffic Management Program (NTMP) plans remaining from the 31 NTMP plans approved in 2011. A list of the 31 plans is included on page 2. The goal of the NTMP is to improve safety and the quality-of-life for residents by reducing the impacts from speeding vehicles and careless drivers on residential streets.

According to Mike Penrose, Director of the Department of Transportation, "The NTMP program is a major focus of the Department. It is also a valuable resource for residents and communities in efforts to slow down traffic on neighborhood streets throughout the unincorporated area of the County. We have had a successful program this year. Of the 31 NTMP plans approved during 2011, 28 plans have already been implemented and the last 3 NTMP plans will be constructed by March 2012."

The NTMP program utilizes neighborhood traffic management devices such as speed bumps, raised crosswalks, and traffic circles to slow down traffic and improve safety on residential streets. The NTMP "toolbox" contains different devices that address neighborhood traffic related concerns. Check [www.sacdot.com/NTMP](http://www.sacdot.com/NTMP) for additional program information.

The cost for implementation of all 31 NTMP plans is \$518,000, and is being covered with Measure "A" sale tax funds.

Residents who would like to have their street or neighborhood considered for the NTMP program, can contact Customer Service at 916-875-5171 or [www.sacdot.com/Contact Us](http://www.sacdot.com/Contact Us).
