For Immediate Release

May 17, 2013

Sacramento, CA—Sacramento County and the City of Rancho Cordova are working cooperatively on the Femoyer Street Improvement Project, which will improve traffic circulation in the Mather Commerce Center area and Rancho Cordova. The project includes: construction of a new portion of roadway on Femoyer Street to fill in a gap between International Drive and McCuen Boulevard; widening and improving an existing portion of Femoyer Street between McCuen Boulevard and Mather Boulevard; constructing a new portion of Airpark Drive east of Femoyer Street; new landscaped medians, sidewalks, street lights and drainage facilities. Information about the construction startup event is listed below:

- **Date/Time** Monday, May 20 @ 10:00 A.M.
- **Location** Airpark Drive off International Drive, Rancho Cordova.
- **Speakers** Board of Supervisors Member Don Nottoli (District 5).
Mayor Linda Budge, City of Rancho Cordova.

This project continues Sacramento County's long-term efforts and investments in the conversion of military bases to civilian uses. Many infrastructure projects have been completed at McClellan and Mather to connect these facilities to local communities and improve roadways to foster new business development and new investments.

(More)

Project benefits include:

- Improved traffic circulation and connectivity in the Mather Commerce Center area and for Rancho Cordova.
- Residents of the Villages of Zinfandel will directly benefit from the Airpark Drive portion of the project, which will improve access for vehicles, pedestrians and cyclists.
- Access to the Mather Commerce Center will be greatly enhanced.

DeSilva Gates Construction is the contractor for this \$3.3 million construction project that is being funded with a combination of the following sources: Mather Fee Program, other Mather Fees and the City of Rancho Cordova.

###

Visuals to Support Story: Elected officials will “push over” a section of fencing to ceremonially start the process to construct these new roadway improvements.
