**Sacramento International Airport Starts Early Fight
Against Cold and Flu Season**

Local Clinic Offers Busy Travelers Flu, Tetanus and Pneumonia Shots

SACRAMENTO, CA. — With cold and flu season right around the corner and only so many hours in a day to get everything on the “to do” list done, how can a busy traveler make time for a flu shot? Sacramento International Airport has the answer. Flu, tetanus and pneumonia shots are now available to passengers at Sacramento International Airport for a nominal fee through cold and flu season without an appointment.

“Maintaining a clean and healthy environment for our customers has always been a consideration,” said G. Hardy Acree, Director of Airports. “Regular cleaning schedules in addition to hands free flush toilets, faucets, soap dispensers and towel dispensers have been the norm at Sacramento International Airport for years. We added hand sanitizer stations prior to flu season last year and have increased the number of the stations and adjusted the locations to ensure that they are readily accessible to our customers.”

Three locations – one each post-security in terminal a and each wing of Terminal B – will conveniently serve passengers who don’t have time to make appointments, wait in long lines or simply keep forgetting to get their annual flu shot. Flu and pneumonia shots are available without appointment for \$30 and a tetanus shot is only \$35.

Sacramento County Airport System is responsible for planning, developing, operating and maintaining the county’s four airports: Sacramento International Airport, Executive Airport, Mather Airport and Franklin Field. For more information, visit www.sacairports.org.
